<Your Practice> GOES MOBILE IN <City, State, or County>  
WITH NEW DENTAL CLINIC VEHICLE

<City, State> -- <Your Practice> has recently purchased a mobile dental clinic to service <area>. The mobile clinic, manufactured by La Boit Specialty Vehicles in Columbus, OH, will travel to areas throughout <city, state, or county> to provide a variety of dental services, including general checkups, extractions, and sedation dentistry. The van will also appear at community events, providing education to the general public on good dental hygiene.

According to the American Dental Association, many Americans lack access to basic dental care because they find it difficult to get to the dentist's office.

"Our hope is that this vehicle will be able to provide services to the most underserved areas of <city, state, or county>, where individuals might not have access to regular dental care" says <staff name>.

The truck includes <insert number> exam chairs and has all the equipment you would find in a typical dentist's office, like an x-ray machine, compressor, autoclave, and dry vacuum.

"The van is a fully-functioning dentist's office on wheels," <says staff>. "It allows us to service several patients in a single day that would otherwise not be able to travel to our office location."

The next stop for the <your practice's> mobile dental clinic will be <insert location, time, and date for next stop>.

For more information on <your practice> or to request a visit from the mobile dental clinic in your area, visit <website> or call <phone number>.
